Professional Summary

Software Engineering student seeking software engineering, embedded software, or embedded systems internships. Experience with Python, Java, C/C++, embedded systems, computer vision, and test automation through an 8-month co-op at Sub-Zero Group.

Education

Iowa State University | Ames, IA
Bachelor of Science in Software Engineering
Overall GPA: 3.4 | Engineering GPA: 4.0 | Expected Graduation: May 2028

Professional Work Experience

Sub-Zero Group, Inc. | Madison, WI

Embedded Software Test Automation Engineering Co-op | Jan 2026 – Aug 2026

- Engineered **Python** software to automate hundreds of DICE ice-machine UI validation steps, using a robotic arm and camera to execute **60+ tests** per multi-hour suite.
- Built a 5-stage **OpenCV/EasyOCR** image-recognition pipeline using screen detection, preprocessing, OCR, template matching, and expected-vs-actual validation; generated **pytest** HTML pass/fail reports with captured failure images.
- Built the **NI VeriStand** environment and custom HIL UI for GR3 gas-range controls, completing Python channel setup/mapping, RTD temperature monitoring, serial-interface testing, and function validation.
- Assembled, wired, and debugged **HIL/DUT** fixtures across **3 appliance platforms** (French Door, Hybrid-M, and GR3), including open-circuit fault simulation to validate embedded control-board behavior.

Iowa State University Department of Electrical and Computer Engineering | Ames, IA

Undergraduate Teaching Assistant | Jan 2025 – Jan 2026

- Primary TA for SE 1850** (Spring & Fall 2025), an introductory C programming course with ~200 students; led 2 lab sections and held 5 office hours/week.
- TA for EE 2850** (Fall 2025); led 2 lab sections, held 4 office hours/week, proctored exams, and graded coursework.
- Provided one-on-one support with C programming and debugging.
- Helped design exams, class activities, and labs, and improved course materials.

A to Z World Languages, Inc. | Sioux Falls, SD

Database Systems Assistant and Interpreter | Sep 2020 – Oct 2024

- Helped modernize the company's database by supporting the move from an outdated **Microsoft Access 2003** system to a newer, more reliable database solution.
- Worked with software engineers to test, debug, document, and improve database-related features and workflows.
- Managed company records and scheduled interpreter appointments, coordinating with hospitals, universities, schools, courts, and other clients.

Personal Projects

Minecraft Terminal | C Programming Language

- Developed a 3D text-based game engine inspired by Minecraft.
- Implemented player movement, collision detection, block placement/breaking, and world saving/loading.
- Optimized rendering with transformation matrices for efficient terminal-based graphics at 100+ FPS.

Relevant Skills

Development: C, C++, Java, Python (OOP, Data Structures & Algorithms), HTML/CSS.

Database: Microsoft Access, VBA.

Embedded & Automation: Embedded Systems, HIL, CAN, NI VeriStand, NI LabVIEW, ATE, pytest.

Computer Vision & Testing: OpenCV, EasyOCR, OCR, Software Testing, System Testing, Regression Testing.

Tools: Git/GitHub/GitLab, Azure DevOps, GitKraken, Android Studio, IntelliJ, Jama, TestRail.

Languages: Native English, Native Arabic, Intermediate Bulgarian
